

Beginning C++ Programming Sequence Containers - Deque

At about 5:27 in this video the following code is incorrect: (Note the mismatched paren and curly).

```
d.emplace_back("Larry", 19};  
d.emplace_front("Moe", 24};
```

It should be:

```
d.emplace_back("Larry", 19);  
d.emplace_front("Moe", 24);
```

Thanks to Peter for pointing that out.
